

**INTEGER WARM UP:**

$$1. \textcircled{5 \times 2} - 3 = \textcolor{red}{10} - 3 = 7$$

$$2. (5)(\textcircled{2 + 8}) = 5(\textcolor{red}{10}) = 50$$

$$3. (-5)(\textcircled{+2 - 6}) = -5(\textcolor{red}{-4}) = 20$$

$$4. (\textcircled{-2 - 3})(+5) = \textcolor{red}{-5}(+5) = -25$$

$$5. (\textcircled{-5 + 2})(-2) = \textcolor{red}{-3}(-2) = +6$$
